# KeepnTrack® Software

MANAGE VOLUNTEERS

KeepnTrack streamlines the volunteer tracking process and offers a proactive approach to managing your volunteer programs.

- Volunteers can apply onsite or online.

- KeepnTrack automatically screens an applicant's information against the national sex offender registry. If any possible matches are found, an onsite staff member is immediately notified.

- Preconfigured to assist you in assigning volunteers to defined activities and events. Administrators can adjust to fit individual needs.

- KeepnTrack tracks hours and expenses for tax and reporting purposes on a district-level.

- Print a visual name badge with the volunteer's name, sign-in time, and activity type.

MANAGE VISITORS

Eliminate the hassles and errors when signing visitors in and out with KeepnTrack's quick and secure Visitor Sign-in.

- Visitors sign in with a name and birthdate, or by scanning their drivers license.

- KeepnTrack automatically screens a visitor's information against the national sex offender registry. If any possible matches are found, an onsite staff member is immediately notified.

- Each visitor must select the purpose of their visit, which will be printed on their badge along with their name and time and date they signed in.

- KeepnTrack keeps all sign-in records, which you can view at anytime and run reports on.

MANAGE STUDENTS

KeepnTrack provides student tracking and reporting capabilities that let you manage the information and paperwork for student activities, early dimissals, and late arrivals.

- Track and report early student dismissals and the explanation for their dismissal, such as for doctor or dentist appointments.

- Track late arrivals and print tardy slips. KeepnTrack provides accurate and instant reports on tardy records organized by student and by date.

- Know which students are on campus at any given time. In case of an emergency, you will know immediately which students have left due to an early dismissal and are no longer on campus.

- Provide staff with necessary student information such as medical conditions, allergies, or special instructions.

INCREASE EFFICIENCY, REDUCE ADMINISTRATIVE COSTS, AND MITIGATE LIABILITY. KEEPNTRACK IS VISITOR MANAGEMENT DONE RIGHT.

KeepnTrack® Hardware

UNIVERSAL SCANNER

- **Quick and accurate identification** – specifically enhanced to read license data for all states that include barcodes on drivers licenses.

- **Optimized for barcode scanning** – able to read 1D and 2D barcodes to capture information from licenses, badges, and KeepnTrack ID cards.

- **Multiple use settings** – may be set to manual, trigger, or "always searching" modes to allow visitors to pass identification underneath the scanner to sign in or out.

HD WEBCAM

- **High resolution** snapshots at up to 5 megapixels. **Pan, tilt, and zoom controls.** Video and photo capture, facetracking, and motion detection ability.

NETWORK LABEL PRINTER

- **Simplified configuration and maintenance** – no drivers or browser plugins to install or update.

- **Shareable** – the printer is given a static IP address on the network and can be used by any machine running KeepnTrack (with access).

- **Fast, reliable, convenient, and durable** – Twice as fast as older printers and approximately 10x the projected life! "Drop in and Print" loading. No messing around to align paper/labels with the feed mechanism. Designed for harsh, demanding, commercial applications.
    Includes a 2-year warranty

BADGE LABELS AND SLIPS

- **Color-coded** – use different colors (green, red, blue, purple, yellow) to indicate each day of the week or the role of your visitors to ensure the right people are in the right location on the right day.

- **Organized and Accurate** – Print customizable tardy slips, early dismissal slips, receipts, etc.

- **Never run out of ink** – Printed using high-speed thermal technology so you never have to worry about running out of ink.

ID CARDS AND KEYCHAIN FOBS

- **Ideal for frequent users** – all user information is instantly time-stamped and recorded in the system with a simple scan of their card.

- **Fast and simple** – assigning accounts, deactivation users, and replacing lost or stolen cards can be done in minutes. Users are signed-in within seconds.
